

Cross-Linked Polymers: Chemistry, Properties, and Applications (ACS Symposium Series)

This new book presents the latest research results on cross-linked polymers from internationally recognized scientists. You'll learn why cross-linked polymers are superior in applications requiring resistance to high temperatures and high mechanical performance. You'll cover current topics in network theory, along with an explanation of the relationship between molecular architecture and macroscopic physical properties. Read about all the main points of cross-linked polymer systems including network modeling and structure, network formation and degradation, and network characterization.

Characterization of Highly Cross-linked Polymers. Chapter 10, pp 165-183. Chapter DOI: 10.1021/010. ACS Symposium Sponsoring Divisions: Division of Polymer Chemistry . of Scission and Cross-Linking Yields of Gamma-Ray Irradiated Polymers. David J.
