

## Hibernation (Natures Patterns)

What is hibernation? Where do different animals hibernate? Which animal hibernates for more than six months? Animal hibernation follows a pattern. Most animals hibernate when it becomes too cold and it is hard to find food. They go into a deep sleep until it gets warmer. Read Hibernation to find out why this pattern happens.

Our findings that dwarf lemurs can hibernate underground in .. Blanco, M. B. & Godfrey, L. R. Hibernation patterns of dwarf lemurs in the highWe present new data showing detailed records of the patterns of hibernation and reproduction of free living echidnas.
