

ISO 13948-2:2000, Diesel engines -- Fuel injection pumps and fuel injector low-pressure connections -- Part 2: Non-threaded (push-on) connections

This part of ISO 13948 specifies requirements for mechanical, push-on connections used on diesel fuel injection pumps and fuel injectors for the connection of low-pressure fuel supply. Two types of push-on connections (types A and B) are described in this part of ISO 13948. Type A is commonly used on diesel fuel injectors and type B on diesel fuel injection pumps. This title may contain less than 24 pages of technical content.
