

Seven Wonders of Asteroids, Comets, and Meteors

Our solar system is full of wonders, and this book tells about seven wonderful objects that have traveled through it. They are: Ceres, the largest asteroid; Ganymede, a large Earth-grazing (but misses) asteroid; the famous Halley's comet (an ice ball whose history goes back to 1066); the Borealis Basin of Mars, (a giant crater formed by an ancient asteroid impact); the magic shooting stars of the Perseid Meteor Shower; the Kuiper Belt, home of comets; and the mysteries of Pluto (planet or asteroid?).
